

OnRes Systems / AccomPro Testimonials

"I have had a lot of nice comments from clients about the ease of booking online and being able to see the availability of the cabin. With a website that allows people to see the facility, the online booking option allows them to make their own reservation for the days they choose--less chance of owner making errors in dates! People like making their own reservation anytime 24/7. I am amazed at the times in which people have booked the cabin. The team at OnRes Systems is professional and easy to work with and AccomPro has increased my reservations.

"TO WHOM IT MAY CONCERN"

We have been using the online reservation system for our small boutique hotel and love it. We looked at other systems before, but chose OnRes because of the look and affordability. There is no huge initial investment; there is only a small setup fee and an affordable monthly rate. So it's easy to start with and there is no risk. Furthermore it is real simple to use, it looks great, and people love the extra service of not having to wait till later to find out what is or isn't available. We are definitely very happy with the system and the people at OnRes Systems.

Dear Friend,

This is my family's weekend getaway cabin. First and foremost, we wanted a package that would allow us to control the "inventory" of available days so as to ensure that we had time to enjoy it. We essentially wanted a package that would allow us to choose days that we wanted to stay there and then leave the remaining balance on the market.

I can't say enough good things about OnRes Systems. It is a fantastic product. I started off with a list of things that I wanted in a booking system (bearing in mind that I had no previous experience this type of program) ---this package had it all.

They are both remarkably helpful and happy to provide assistance when needed---and always in a very timely way.

In my opinion, this is the most impressive feature:
<http://www.pawEEKENDgetaway.com/default.aspx?p=114457>

It is a 1 year "look ahead" that automatically updates each time a reservation is made!! It also reflects the days in which we have removed days from the inventory. This saves endless inquires about whether a certain day is available. The fact that it is automatically updated is what impresses me most about the package. I have seen packages that appear to have this feature---but in reality it is just a jpeg image that needs to be manually uploaded each time a reservation is made.

No disadvantages. It is a great product.

"This is to testify that since our introduction to OnRes system early in 2003 along with their AccomPro feature, we have seen an increase in business flow to Alpine Chalet. Furthermore, this system also provides an easy to use manual input and proves to be fully automated and a very reliable reservation system to use. It would be an understatement to say that we are very satisfied with this setup and could recommend it to others looking for similar systems and results. It is money well spent and invested along with many happy customers as an outcome. That alone in today's competitive business market is simply priceless".

Ross Senovasky, Managing Director

"The AccomPro reservation system fits seamlessly into our website and provides our visitors with an easy to use reservation system that makes other booking systems look out of place or complicated to use.

There is no distraction in the interface, and the booking steps are all easily navigated which is very important from the perspective of visitor to customer conversions; one of the most important parts of any website. From an administrative stand point, the AccomPro is also easily configured and loading new products or changing inventory to existing ones is done quickly and logically. I recommend this reservation system to any business weather a small bed and breakfast, apartment rental agency, or a large hotel".

Radek Z, Marketing Manager

Thank you to all at OnRes and keep up the good work!

Yours truly,

A Stay in Ely

A Stay Inn Ely has been very happy with AccomPro. The reservation system is extremely user friendly. Both our customers and our employees find making and handling reservations simple and straight forward. The number of reservations we receive on-line has risen dramatically since we switched to AccomPro. We have only experienced one small problem with the system and it was corrected in less than a day. I give my strongest recommendations regarding this reservation program.

Thank-you for assisting us in providing a wonderful lodging experience for our guests --- starting right at the initial reservation.
